

A. M. promises £10.

20, LANGHAM PLACE.

25. March 84

Dear Geo. Macmillan,

You will be glad
to hear, that I yesterday
was able to persuade the
Council of the Geographical
Society, to subscribe £100—
to the Axi's minor fund.—

It was not without difficulty,
& on one time I thought

30. LONDON PLACE. 
The bundle was lost - the
grants reduced to £40.

but it is all right now.

This will I think do
not only secure our making
up the £500 wanted but
serve as a decoy duck
to induce other executives
to do as likewise. -

Have you tried the Royal?
I think they might be induced
to give £50, if it is properly
put before them. -

Up to date, what is promised
by private individuals."
